Carolinacon asks, “geniuses, please line up to speak.”

Chapel Hill, NC, April 20-21

The Carolinacon Group, a 501(c)3 non-profit organization dedicated to technology education, will be hosting Carolinacon 2007 on April 20-21 at the Holiday Inn in Chapel Hill, NC. This is our third annual conference. We will have speakers, presentations, and trivia games on a wide variety of science and technology topics.

All persons who have educated themselves about technology and complex systems of any kind are invited to present their ideas and otherwise participate in our conference.

All submissions are due by February 15th, 2007.

Those who speak at the conference will receive:

- * free admission
- * a Carolinacon 2007 t-shirt
- * an invitation to a private soiree during the conference
- * minimal fame and glory

Carolinacon Group values diversity of ideas, so we don't want anyone to hesitate to propose things, no matter how outlandish. You don't have to be the most eloquent orator or the highest expert, just come and share your ideas and information for 30 minutes or an hour.

A few of the most popular past topics have included IPv6 Implementations/Demos, Reverse Engineering, Structural Underpinnings of 2D and 3D Graphics, Color Theory (why yellow and blue don't make green), The History of Pirate Radio Stations, Ethics in Hacking, Nanotechnology (The Hack-Nano Project), A Chronology of the Phrack Microcosm, DNS Hacks, Gender in Hacking (Dr. Thomas J. Holt, UNC Charlotte), A College of Hacking, Building Competitive Robots, and many more.

To volunteer to speak at Carolinacon 2007, one should send an e-mail to speakers@carolinacon.org with the following information:

- * your name and/or handle
- * a title for the presentation
- * the estimated running time of your presentation
- * a brief topic abstract
- * a phone number where you can be reached

About The Carolinacon Group

The Carolinacon Group is a North Carolina-based 501(c)3 non-profit organization dedicated to technology education. In addition to the Carolinacon conferences, the group also supports a learning laboratory and public initiatives to educate kids away from non-constructive malicious computer hacking activities. All donations are tax deductible.
